Uvod

Republika Hrvatska zasigurno je jedinstven prirodni prostor na kojem je na relativno maloj površini zastupljena tolika prirodna raznolikost povezana u čudesnom spoju Sredozemlja, Alpa i Panonije. Reljefna i klimatska različitost Hrvatske uvjetuje i njezinu raskošnu vegetacijsku raznolikost, od riječnih otoka na Dunavu, porječja Drave, autohtonih šuma vrbe, bijele i crne topole, preko najljepših i najvrjednijih šuma hrasta lužnjaka i poljskog jasena, te brdskih šuma hrasta kitnjaka i bukve, sve do prekrasnih prirodnih šuma bukve i jele Gorskog kotara i Like. Da bi šume u Hrvatskoj ispunjavale svoju gospodarsku, ekološku i općedruštvenu ulogu, Republika Hrvatska osnovala je trgovačko društvo Hrvatske šume d.o.o. koje gospodari tim prirodnim bogatstvom po načelima održivosti, odnosno prema strogim socijalnim, ekološkim i ekonomskim normama.

U dugogodišnjoj tradiciji šumarske struke u Hrvatskoj, osim gospodarenja šumama i šumskim zemljištem, Hrvatske šume d.o.o. gospodare i lovištima, što na neposredan način svjedoči o integralnom gospodarenju divljači i šumom u kojoj kao rijetko gdje na starom kontinentu, žive i razmnožavaju se sva tri europska predatora: smeđi medvjed, vuk i ris. Danas Hrvatske šume d.o.o. gospodare s 22 otvorena lovišta, 1 ograđenim lovištem i s 3 uzgajališta divljači na ukupnom prostoru od 298 913 ha. Otvorena lovišta zauzimaju 292 818 ha, ograđena lovišta 4 140 ha, dok se različite vrste divljači uzgajaju u posebno pripremljenim i stručno vodenim uzgajalištima površine od 1 955 ha. Velika financijska sredstva i značajan stručni potencijal Hrvatske šume d.o.o. ulažu u fondove divljači kako bi se postigla njihova najbolja dobna i spolna struktura. Isto tako rad na podizanju vrijednosti trofejne strukture divljači postavlja se kao trajna zadaća na zadovoljstvo sve većeg broja domaćih i stranih lovaca. U našim lovištima mogu se loviti gotovo sve vrste divljači, a iz naše ponude posebno ističemo lov u rici dočekom na običnog jelena, skupni lov na divlje svinje, te lov na smeđeg medvjeda. Posebnu skrb posvećujemo stalnom praćenju zdravstvenog stanja divljači u našim lovištima, provodeći veterinarsko-sanitarne mjere i pregled zdravstvene ispravnosti mesa sve odstrijeljene divljači.

Izgled i održavanje lovnotehničkih i lovnogospodarstvenih objekata postalo je prepoznatljiva značajka naših lovišta, a opremljenost, udobnost i vrhunska ugostiteljska usluga u brojnim lovačkim domovima odličan su pokazatelj, lovišta, ljudi, običaja i kulinarskih dostignuća naših krajeva.

Introduction

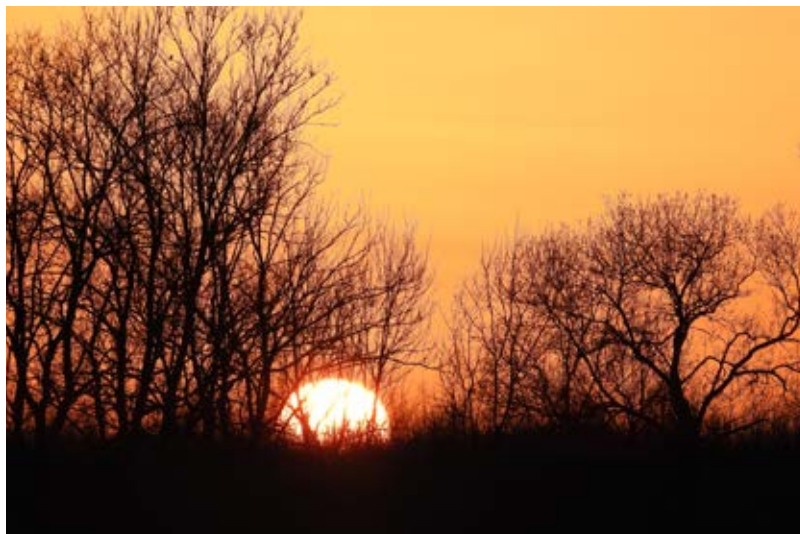

The Republic of Croatia is certainly a unique natural space where so much biodiversity is represented on a relatively small area, in this magnificent combination of the Mediterranean, the Alps and Panonia. The relief and climatic variety of Croatia enables its vegetational diversity, from river islands on the Danube, the Drava basin, indigenous forests of willow, white and black poplar, the most beautiful and valuable forests of pedunculate oak and narrow-leaved ash, mountain forests of sessile oak and beech, to the magnificent natural forests of beech and fir in Gorski kotar and Lika. To ensure that the forests of Croatia fulfill their economic, environmental and general social purposes, the Republic of Croatia has established a company styled Hrvatske šume d.o.o. which manages such natural wealth in line with the principles of sustainability and in compliance with strict social, environmental and economic standards.

As part of Croatia's longstanding forestry tradition, Hrvatske šume d.o.o. manage hunting grounds in addition to managing forests and forest land, which directly demonstrates integral management of game and forests, which are among the rare ones on the Old Continent where all three European predators live and breed: brown bear, wolf and lynx. Hrvatske šume d.o.o. presently manages with 22 open hunting grounds, 1 enclosed hunting ground and with 3 breeding hunting grounds covering area of 298 913 ha. Open hunting grounds account for 292 818 ha, enclosed hunting grounds account for 4 140 ha, whereas different game species are bred on specially prepared and professionally managed breeding grounds covering 1 955 ha. Hrvatske šume d.o.o. invests substantial funds and professional resources in game stocks to ensure their optimal age and gender structures. In addition, our work on raising the value of the trophy-hunting game is a permanent task to the satisfaction of an increasing number of local and foreign hunters. Almost all game species can be hunted in our hunting grounds, including in particular roar hunting of red deer, collective hunting of boars, and brown bear hunting. We use special efforts to monitor the health of game in our hunting grounds, implement veterinary & sanitary measures and check that the flesh of all game killed is safe.

The style and maintenance of technical and management facilities have become a distinctive feature of our hunting grounds, whereas the top level of equipment, comfort and hospitality services in our numerous hunting lodges perfectly reflect our hunting grounds, people, customs and culinary achievements of the region.

Spačva

UŠP Vinkovci

lovište XVI/11, Spačva

HR

U jugoistočnoj Slavoniji između rijeke Save i Dunava, na području Vukovarsko-srijemske županije smješteno je poznato slavonsko lovište Spačva. Slavonska ravnica nadmorskih visina od 77 do 90 metara, ispresjecana brojnim vodenim površinama, tipičan je prizor lovišta, smještenoga u najvećem neprekinutom kompleksu šuma nadaleko poznatog slavonskoga hrasta. Lovište pruža idealne uvjete za obitavanje običnog jelena, obične srne i divlje svinje, a raznovrsnost ptica livadarki i ptica močvarica, te ostalih životinjskih vrsta pruža lovcu nezaboravan doživljaj prirode i lova. U sustavu lovišta su rezervati šumske vegetacije Lože i specifičan krajolik Virovi, koji podsjećaju na šume kako sunekad izgledale. Zimski skupni lov na divlje svinje te pojedinačan lov u rici na jelena poseban su lovački doživljaj. U udobnom lovačkom domu "Dvorac Spačva" nudi se lovcima nakon napornog lovnog dana uživanje u nadaleko poznatim slavonskim kulinarskim specijalitetima

ENG

Spačva, a famous Slavonian hunting ground, is located in Southeast Slavonia, between the rivers of Sava and Danube in Vukovar-Srijem County. Slavonian plains with altitudes between 77 and 90 meters, crisscrossed with numerous bodies of water, are a typical scene of this hunting ground, situated in the largest uninterrupted complex of forests of the widely known Slavonian oak. The hunting ground provides an ideal habitat for red deer, roe deer and boar, whereas the diversity of meadow and wetland birds and other animal species provides each hunter with an unforgettable nature and hunting experience. The hunting ground includes the Lože forest vegetation preserves and special landscape Virovi, which remind us of the way our forests used to look. Collective wintertime hunting of boars and individual roe deer hunting of deer are special hunting experiences. The comfortable hunting lodge "Dvorac Spačva" allows hunters to enjoy widely renowned Slavonian specialties after a hard day of hunting.

Kunjevci

UŠP Vinkovci

lovište XVI/8, Kunjevci

HR

U sustavu poznatih vinkovačkih lovišta nalazi se i uzgajalište divljači Kunjevci. Površina uzgajališta obuhvaća tipične slavonske hrastike, koji su u svijetu poznati po svojoj kakvoći i ljepoti. Uzgajalište je primjereno uređeno s održanim prosekama, košenim livadama i lovničkim stazama. Namjena je uzgajališta uzgoj visokotrofejnih grla jelena lopatara i muflona, pa je lov dočekom, šuljanjem ili privozom kolima, uz stručno lovno osoblje, nezaboravan doživljaj svakom ljubitelju lova i prirode. Novoizgrađeni lovački dom Kunjevci pružit će lovcima vrhunski komfor uz izvrsnu slavonsku kuhinju i birana slavonska vina.

ENG

The Kunjevci breeding ground is part of the popular hunting grounds of the Vinkovci region. The breeding ground includes typical Slavonian oak groves, globally renowned for their quality. The breeding ground is intended for the breeding of prime trophy specimens of fallow deer and mouflon, which is why static, stalking and cart-assisted hunting, accompanied by professional staff, is an unforgettable experience for each hunting and nature enthusiast. The newly built hunting lodge Kunjevci will provide each hunter with first-class comfort, including excellent Slavonian cuisine and selected Slavonian wines.

Breznica

UŠP Osijek

lovište XIV/1, Breznica

HR

Lovišta smještena u istočnom dijelu Republike Hrvatske, u Osječko-baranjskoj županiji i slavonsko-baranjskom lovnom području pravi su biser hrvatske lovne ponude. Đakovo kao povijesno i kulturno središte regije sa svojom katedralom simbolizira taj kraj. Godine 1870. Biskup J.J. Strossmayer uređuje tadašnje lovište Mačkovac kao uzgajalište jelena i divljih svinja. Lov se profesionalno organizira, uz puno poštovanje lovne kulture i hrvatske lovne tradicije. Posebno se ističe organizacija skupnog lova na divlje svinje s mogućnošću vrlo bogatog odstrjela. Lovački dom Kondrić nalazi se u samom lovištu, a sa svojim luksuznim uređenjem jamči ugodan boravak gostima te pruža mogućnost organizacije sastanaka, susreta i seminara uz bogatu gastronomsku ponudu, iz koje izdvajamo jela od divljači i nadaleko poznata đakovačka vina.

ENG

The hunting grounds situated on the east side of the Republic of Croatia, in Osijek-Baranja County and within the Slavonia-Baranja hunting region, are a true jewel of Croatia's hunting offerings. As a historical and cultural center of the region, Đakovo and its cathedral are symbols of this region. In 1870, Bishop J.J. Strossmayer improved the former Mačkovac hunting ground to become a breeding ground for deer and boar. Hunting is organized professionally, with full respect for the hunting culture and Croatia's hunting tradition. This in particular includes collective boar hunting, providing opportunities for very abundant kill. The Kondrić hunting lodge is situated within the hunting ground and its luxurious amenities ensure that each guest has a pleasant stay but also offers options such as the organization of meetings, encounters and seminars, with a rich gastro offer, including in particular the game dishes and widely renowned wines of Đakovo.

Podunavlje-Podravlje

UŠP Osijek

lovište XIV/9, Podunavlje - Podravlje

HR

Baranja je smještena u sjeveroistočnom dijelu Hrvatske. Povijest joj je bila veoma burna, ali ju obilježuje jedna stalnica: uvijek je bila poznata po bogatstvu divljači i lovu koji je pronosio glas lovišta Baranje diljem svijeta. Lovište je osnovano davne 1697. godine kada je Eugen Savojski dobio posjede od cara Leopolda I. te je lovište tijekom cijele svoje povijesti bilo u posjedu raznih vladara. Lovište obuhvaća poplavne šume uz Dravu i Dunav, posebno bogate jelenima i divljim svinjama. U čudesnom spoju prirode i divljači mnogi su lovci stekli vrijedne trofeje baranjskog jelena loveći dočekom, šuljanjem ili privoznim kolima na jelena u rici, dok skupni lov pruža mogućnost odstrjela i do stotinu grla svinja. Lovcima se nudi smještaj u vrhunskim objektima Zlatna greda i Monjoroš, koji pružaju mogućnost organizacije sastanaka, susreta i seminara uz bogatu gastronomsku ponudu, iz koje posebno izdvajamo jela od divljači.

ENG

Baranja is situated on the northeast side of Croatia. Its history has been very turbulent, with only one constant feature: it has always been well-known for its abundance of game and hunting options that have made the hunting grounds of Baranja famous across the world. The hunting ground was established back in 1679, when Eugene of Savoy was awarded estates by Emperor Leopold I, and was held by various rulers throughout its history. The hunting ground includes floodplain forests along the Drava and Danube, particularly rich in deer and boar. In this wonderful combination of nature and game, many hunters obtained valuable trophies of Baranja deer, roe hunting it statically, by stalking or with the aid of a cart, whereas collective hunting provides an opportunity to kill as many as a hundred hogs. Accommodation is available to hunters in the first-class Zlatna greda and Monjoroš facilities, which also provide the option of organizing meetings, encounters and seminars with rich gastro offerings, including in particular game dishes.

OTVORENO LOVIŠTE / OPEN HUNTING GROUND

Radinje

UŠP Nova Gradiška

Lovište XII/16, Radinje

HR

Uz rijeku Savu, u miru ravnice i šumama hrasta i jasena, smjestilo se poznato lovište Radinje. U blizini lovišta nalazi se posebni rezervat šumske vegetacije "Muški bunar" s jednom od najstarijih zajednica hrasta kitnjaka i bukve kao i "Prašnik" s najstarijom zajednicom hrasta lužnjaka u Europi. Lovište je osnovano 1955. godine i ugostilo je mnoge lovce iz različitih zemalja. Pored tradicionalnog lova na visoku divljač i svinje organiziramo i lov na zeca, fazana, prepelicu i divlju patku. Lovački dom Radinje pružiti će lovcima ugodan odmor nakon uspješnog lovnog dana.

ENG

The popular Radinje hunting ground is situated along the river Sava, featuring tranquil plains and oak and ash forests. Not far from the hunting ground is "Muški bunar", a special forest vegetation preserve including one of the oldest communities of sessile oak and beech, as well as "Prašnik", featuring the oldest community of pedunculate oak in Europe. Established in 1955, this hunting ground has welcomed hunters from various countries. In addition to traditional big game hunting, we also organize hunting for hare, pheasant, quail and wild duck. The Radinje hunting lodge will ensure that each hunter has a pleasant rest after a successful hunting day.

Žabljački lug-Česma

UŠP Bjelovar

Lovište VII/17, Žabljački lug - Česma

HR

U pitomoj dolini rijeke Česme, između obronaka Bilogore, Moslavačke gore i Kalnika smješteno je nizinsko lovište Žabljački lug - Česma. Lovište je okruženo širokim pojasom livada i pašnjaka, a južni dio lovišta između rijeka Česme i Velike zauzimaju šume hrasta lužnjaka i običnoga graba. Zbog posebnosti vegetacijskog pokrova ovoga posebnoga nizinskoga lovišta boravak u prirodi i lov na visokovrijedna trofejna grla srnjaka, jelena i vepra ostaje u trajnom sjećanju svakomu lovcu koji je boravio u ovom lovištu.

ENG

Nestled between the slopes of Bilogora, Moslavačka gora and Kalnik, the tame valley of the river Česma is where the lowland hunting ground Žabljački lug Česma is to be found. The hunting ground is surrounded by a wide belt of meadows and pastures and its south side between the rivers Česma and Velika is occupied by pedunculate oak and common hornbeam forests. Thanks to the distinctive vegetative cover in this extraordinary lowland hunting ground, being in nature and hunting for prime specimens of roebuck, deer and boar will permanently remain in the memory of each hunter who spends time in this hunting ground.

Repáš

UŠP Koprivnica

Lovište VI/9, Repaš

HR

Miris svježe izorane brazde, zlatno srpanjsko klasje i hladovina stoljetnih hrastova prizor je lovišta kroz koje prolaze dravski rukavci s poznatom Čambinom. U okolici se lovišta prostiru plodne livade i mala sela. To je Podravina. U lovištu Repaš lovac može susresti kapitalnog jelena, vepra ili srnjaka. Loviti može s visoke čeke, šuljanjem ili privoznim kolima. Na Dravi, koja protječe lovištem, zimi se mogu loviti divlje patke i guske. Lovcima nudimo smještaj u konformnom lovačkom domu Čambina u blizini kojega je moguće i pecanje. Volite li uzbuđenje lova u poplavnim šumama uz Dravu, ovo je lovište pravi izbor za Vas.

ENG

The smell of freshly plowed land, golden wheats of July and the shade of centuries-old oak trees is a typical scene to be found in this hunting ground crossed by Drava's streams, including the famous Čambina. The hunting ground is surrounded by fertile meadows and small villages. This is Podravina. The Repaš hunting ground will give a hunter an opportunity to encounter a huge deer, boar or roebuck. The hunting options include tree stands, stalking and cart-assisted hunting. In wintertime, wild ducks and geese can be hunted on the Drava, which flows through the hunting ground. Accommodation is available to hunters in the comfortable Čambina hunting lodge, with fishing options nearby. If you like exciting hunting in floodplain

Peski

UŠP Koprivnica

Lovište VI/6, Peski

HR

Unutar plodnih podravskih oranica i livada nalaze se Đurđevački peski, okruženi gustim nizinskim šumama. Zapuha i dina više nema, a samo mali dio te "hrvatske Sahare" ostao je pokretan i bez vegetacije zbog utjecaja vjetra te nijemo zbori o prošlosti hrvatske Podravine. Tu je jedna od najvećih fazanerijskih državi, čiji uzgoj fazana, uz prirodnu divljač, jamči dobar lov s korištenjem vrsnih pasa ptičara. Lijepi krajolici, bogatstvo divljači te smještaj lovaca u prekrasnom domu "Peski" daje ugled ovom lovištu.

ENG

Surrounded by thick lowland forests, Đurđevački peski lies nestled within fertile ploughland and meadows of Podravina. Drifts and dunes are no longer to be found here and only a small part of this "Croatian Sahara" has remained mobile and free from vegetation as a result of wind, a silent witness of Croatian Podravina's past. The area includes one of the largest pheasant breeding grounds in the country, guaranteeing good hunting with skilled pointing dogs, in addition to natural game. This hunting ground owes its reputation to beautiful landscapes, an abundance of game and availability of lodging in the splendid Peski hunting lodge.

Posavske šume

UŠP Sisak

Lovište III/28, Posavske šume

HR

U Posavini između Save i Une ureden je veliki kompleks hrasta lužnjaka i jasena. To je nizinsko lovište Posavske šume. Lovac koji želi osjetiti čari nizinskih močvarnih šuma, s dobro uređenim prosjekama i lovnim objektima, na pravom je mjestu. U maglovitim jesenskim jutrima možete uživati u odstrjelu divljih svinja, ili se šuljati po gredama za plahim srnjakom. Na dijelu lovišta dobro je organiziran lov na divlje patke, šljuke i prepelice. Lovcima je omogućen smještaj u lovačkom domu Cerovljani.

ENG

A large, organized complex of pedunculate oak and ash lies in Posavina, between the rivers Sava and Una. A hunter desiring to feel the thrill of wetland forests with well-organized passages and hunting facilities has come to the right place. On a foggy autumn, you can enjoy shooting boars or stalk timid roebuck across beams. Part of the hunting ground is reserved for wild duck, snipe and quail hunting. Accommodation is available to hunters in the Cerovljani hunting lodge.

Petrova gora

UŠP Karlovac

Lovište IV/22, Petrova gora

HR

Petrova je gora brežuljkasto lovište poznato po pogibiji posljednjeg hrvatskog kralja Petra Svačića. Vrhunski lov na Petrovoj gori je lov na divlje svinje, gdje su mnogi veprovi ocijenjeni zlatnom medaljom, zatim na kapitalnoga srnjaka ili na šljuku, šumsku kraljicu u vrijeme jesenskog preleta na rubnim dijelovima lovišta. U novootvorenom domu Muljava lovci se mogu udobno smjestiti uz ponudu vrhunskih vina i specijaliteta od divljači.

ENG

Petrova gora is a hilly hunting ground, well-known as the location where the last Croatian King Petar Svačić perished. First-class hunting on Petrova gora, includes boar hunting, with many gold medals awarded to boars in the past, prime roebuck, and snipe, the forest queen flying over the edges of the hunting ground in autumn. Comfortable accommodations are available to hunters in the newly opened Muljava lodge, including a range premium wines and game specialties.

Pokupski bazen

UŠP Karlovac

Lovište IV/9, Pokupski bazen

HR

Između autoceste Zagreb - Karlovac i rijeke Kupe, u pitomoj ravnici nalazi se nizinsko lovište Pokupski bazen. To je tipično stanište divlje svinje, srbeće divljači, divlje patke i u jesen šumske šljuke. S dobro opremljenih zatvorenih čeka cijele je godine moguće loviti divlje svinje i pernatu divljač, a u ljeto i jesen srnjaka. Smještaj je organiziranu seoskom turizmu u okolici Jastrebarskoga, poznatoga po dobrim vinima i bogatim gastronomskim specijalitetima.

ENG

The lowland hunting ground Pokupski bazen lies in a tame valley between the Zagreb-Karlovac Motorway and the river Kupa. This is a typical habitat habitat for boars, roe deer and wild ducks, as well as forest snipe in autumn. Wellequipped and enclosed tree stands allow hunters to hunt for boar and game birds all year long, as well as roebuck in summertime. Accommodation is available at a rural tourist facility near Jastrebarsko, well-known for its good wines and an extensive offer of gastro specialties.

Bjelolasica

UŠP Delnice

Lovište VIII/2, Bjelolasica

HR

U zaleđu Kvarnera, u srcu Gorskog kotara smjestilo se lovište Bjelolasica. Brojne vrste gorske divljači, kao što su smeđi medvjed, jelen, srna i divlja svinja, plaha divokoza, ponovno unesen ris ili zaštićeni vuk i tetrijeb gluhan, stanovnici su tog lovišta. U njemu su stečeni najjači trofeji smeđeg medvjeda okićeni najlaskavijom titulom tadašnjega svjetskoga i nacionalnoga prvaka. Nezaboravan je lov na jelena u hladnijim jesenskim danima koji je često u gorskim krajevima popraćen snijegom. Dočekom na dobro izgrađenim visokim čekama lovac se može nadati da će ugledati vuka, pa čak i risa, ukrase crnogoričnih šuma. U lovištu su lijepo uređeni lovački domovi, u kojima se za lovce brinu dobri domaćini.

ENG

The Bjelolasica hunting ground is situated in Kvarner's hinterland, in the very heart of Gorski kotar. The hunting ground is inhabited by numerous species of mountain game, such as brown bear, deer, roe deer, boar, timid chamois, reintroduced lynx, protected wolf and western capercaillie. The most valuable brown bear trophies were obtained here, awarded the flattering titles of world and national champions. Hunting for deer on a cold autumn day, often including some snow in this mountainous region, is an unforgettable experience. Observing from a solid tree stand, a hunter can hope to spot a wolf, or even a lynx, true ornaments of the coniferous forests. Nice hunting lodges are available within the hunting ground, where kind hosts will attend to hunters' needs.

Smrekova draga

UŠP Delnice

Lovište VIII/21, Smrekova draga

HR

Čudesan je boravak i lov u šumama Gorskoga kotara. Smrekova je draga smještena u veličanstvenom miru i zelenilu stoljetnih bukovo-jelovih šuma risnjačko-snježničkoga masiva, uz granicu Nacionalnoga parka Risnjak. Tko ondje nije lovio kraškoga jelena u rici, medvjeda s dočekom s visoke čeke ili slušao pijev tetrijeba gluhana u rano praskozorje, taj nije doživio pravi lovački raj. U jezerima Bajeru, Lokvarskome, Lepenici i gornjem toku rijeke Kupe moguć je lov na salmonoide, Lovce u lovu prati stručno osoblje, a smještaj je organiziran u udobnim lovačkim domovima u samom lovištu.

ENG

Spending time and hunting in the forests of Gorski kotar is a magnificent experience. Smrekova draga is located in the wonderful quiet and greenery of centuries-old beech and fir forests, bordering on Risnjak National Park. If you have not hunted for roaring karst deer, waited for a bear to show up from a high tree stand or listened to the song of western capercaillie in the early morning, you have yet to experience a true hunter's paradise. Bajer Lake, Lokvarsko Lake, Lepenica and upper Kupa provide options of salmonoid fishing. Hunters are accompanied by professional staff and accommodations are available in comfortable hunting lodges within the hunting ground.

Ričičko bilo

UŠP Senj

Lovište VIII/29, Ričičko bilo

HR

Lovište Ričičko bilo nalazi se na najljepšoj hrvatskoj planini, na Velebitu, na nadmorskim visinama od 1200 do 1400 metara. Velebit je veoma bogat mnogim biljnim i životinjskim vrstama. Lovište obuhvaća autohtone šume bukve, jele i klekovine, s prekrasnim livadama i kamenjarima. U lovištu obitavaju zaštićeni vuk, ris i tetrijeb gluhan. U sigurnosti opremljenih visokih zasjeda lov dočekom na smeđeg medvjeda ili tajnovitog planinskog veptra, kao i jutarnje šuljanje po livadama i proplancima u lovu na kraškoga jelena u rici pružit će lovcu neopisive i jedinstvene užitke boravka u prirodi.

ENG

The Ričičko hunting ground is situated on Velebit, Croatia's most beautiful mountain, at altitudes between 1200 and 1400 meters. Velebit is very abundant in many plant and animal species. The hunting ground includes indigenous forests of beech, fir and dwarf pine, with wonderful meadows and rocky areas. The hunting ground is inhabited by protected wolf, lynx and western capercaillie. Static hunting for brown bear or the mysterious mountain boar in the safety of well-equipped high ambush points or stalking across meadows and glades in pursuit of a karst deer will give

Sjeverni Velebit

UŠP Senj

Lovište IX/14, Sjeverni Velebit

HR

Sjeverni Velebit obuhvaća središnji dio te najveće hrvatske planine između mora i kršne Like. Unutar iskonskih bukovo - jelovih šuma mogu se sresti zaštićeni vukovi, risovi i tetrijebi. Urednost lovišta, komfor visokih zasjeda za doček smeđeg medvjeda ili kapitalnog vepra, ili zahtjevan lov šuljanjem na jelena u rici, uz mirise planinskih livada, ostaju u nezaboravnom sjećanju svakomu lovcu. Za odmor lovaca nakon napornog dana na raspolaganju su luksuzni objekti, "Muzej šumarstva" i "Šumarska kuća".

ENG

North Velebit includes the central part of this largest Croatian mountain, nestled between the sea and karstic Lika. Protected wolves, lynx and grouse can be encountered within ancient beech and fir forests. The organization of the hunting ground, the comfort of high tree stands to wait on a brown bear or a major boar specimen, as well as demanding stalking of roaring deer enhanced by the aroma of mountain meadows will remain a lasting memory of each hunter. Luxurious properties styled Muzej

Biokovo

UŠP Split

Lovište XVII/1, Biokovo

HR

Lovište Biokovo svrstava se u najpoznatija lovišta za lov na divokoze u ovom dijelu Europe. Ovo izrazito planinsko lovište s nadmorskim visinama od 380 do 1750 metara idealno je stanište za divokoze, muflone i divlje svinje. Kapitalni trofeji odstrijeljenij divojaraca pronijeli su ime Biokova diljem svijeta. Brojnost divljači, kakvoća trofeja te surovost prirode i pjev ptica kamenjarki dovoljan je razlog zbog kojeg se lovci uvijek vraćaju na Biokovo. Lovište je idealno za boravak cijele obitelji, koja može uživati u čarima mora dok lovački dio uživa u lovu.

ENG

The Biokovo hunting ground is among the most popular chamois hunting grounds in this part of Europe. This very mountainous hunting ground with altitudes ranging between 380 and 1750 meters is an ideal habitat for chamois, mouflons and boars. Prime trophies of male chamois have made Biokovo famous across the world. The abundance of game, quality of trophies, harsh nature and the song of birds inhabiting this rocky area are the reasons why hunters keep returning to Biokovo. The hunting ground is an ideal place for families, with some members enjoying the thrills of the sea while hunting members enjoying their hunt.

Oštrica

UŠP Split

Lovište XV/2, Oštrica

HR

Uzgajalište Oštrica maleno je površinom, ali dobro uređeno za lov na muflone. U neposrednoj blizini je Šibenika, uz samu obalu najplavijeg mora na svijetu, a poluotok je prema kopnu ograđen nekoliko metara visokim kamenim zidom iz 15. stoljeća. Kroz sredozemnu vegetaciju napravljene su lovne staze i prosjeke pa se preporučuje lovcima koji nisu spremni na veće tjelesne napore u lovu na zahtjevne muflone. Nakon ugodnog lova gosti se mogu opustiti uz dalmatinske specijalitete i dobra vina.

ENG

The Oštrica breeding ground covers a small area but is well-organized for mouflon hunting. It is located in the immediate vicinity of Šibenik, right next to the shore of the bluest sea in the world, and the land-facing part of the peninsula is enclosed by a stone wall, several meters high and dating back to the 15th century. Manmade hunting trails and passages run through the Mediterranean vegetation, which is why this hunting ground is recommended to hunters who are not ready for the physical strains involved in the demanding hunt for mouflon. After pleasant hunting, hunters can relax with some Dalmatian specialties and good wine.

Sv. Ilija - Orebić

UŠP Split

Lovište XIX/10, Sv. Ilija-Orebić

HR

Sv. Ilija Orebić je najpogodnije prirodno stanište za mufl onsku divljač u ovom dijelu Europe. Smješteno je na poluotoku Pelješcu na nadmorskoj visini do 960 metara. Budući da nema cesta, kretanje je lovištem moguće samo po lovnim stazama uz uporabu teglećih životinja koje nose opremu potrebnu za boravak u lovištu. To je izazov za istinske zaljubljenike iskonskoga lova, koji će se na strmim stijenama približiti mufl onu, a uz malo sreće i okititi trofejima s preko 230 CIC točaka. Smještaj lovaca primjeren je načinu lova pa boravak lovaca u planinskoj kući s otvorenim ognjištem i pogledom na obližnje otoke pruža nezaboravne trenutke.

ENG

Sv. Ilija Orebić is the most suitable natural habitat for mouflons in this part of Europe. It is located on the Pelješac peninsula at an altitude of up to 960 meters. As no roads are available in this area, visitors must travel on hunting trails, assisted by draft animals that carry the equipment necessary for their stay in this hunting ground. This is a challenge for true lovers of traditional hunting who will approach a mouflon on steep rock and, if they are lucky, win a trophy carrying more than 230 CIC points. Lodgings for hunters are appropriate for this hunting style – a mountain lodge with an open fireplace and a view of the nearby islands provides unforgettable experiences.
